

**FEMP  
FIRST THURSDAY  
SEMINS@RS**energy  
economy  
environment...online, live, and anytime.

May 6, 2010

**FREE ONLINE TRAINING SEMINARS**From the Federal Energy Management Program  
[www.femp.energy.gov/training](http://www.femp.energy.gov/training)**Next Seminar: May 6, 2010****1:30 - 3 p.m. Eastern****FEDERAL GREENHOUSE GAS  
ACCOUNTING AND REPORTING**

An update on new greenhouse gas (GHG) regulatory requirements, as well as strategies, models, and technology tools to measure GHG emissions.

**WHAT YOU WILL LEARN:**

- IDENTIFY key types and sources of Federal greenhouse gas emissions.
- UNDERSTAND the emerging greenhouse gas accounting and reporting framework.
- ALIGN AND INTEGRATE diverse agency activities, processes, and resources related to greenhouse gas reductions.
- ADOPT AND IMPLEMENT accepted methods for gathering reliable data to measure progress, evaluate results, and improve performance.

**About the Experts:****Matt Gray***Analyst-Sustainability and Greenhouse Gases, FEMP*

At the Federal Energy Management Program, Matt Gray serves as program lead on sustainability and greenhouse gases, chair of the Interagency Sustainability Working Group (ISWG), and leads development of the GHG accounting and reporting guidance recommendations required in E. O. 13514. He holds degrees in Industrial Engineering and Anthropology from the University of Pittsburgh, and an MPA in Environmental Science and Policy from Columbia University.

**Rob Hardison***Logistics Management Institute (LMI)*

Rob Hardison is an energy and sustainability consultant specializing in alternative energy technologies and greenhouse gas management. He earned a B.S. in Environmental Engineering from the University of Notre Dame, and an MBA and MPA from the University of Washington.
